AURUM MONTAN VIII

MONTAN VIII – following in VULKAN's footsteps

AURUM MONTAN VIII, Finish: glossy black

PRESS RELEASE
May 2009

Product features:

- pressure-chamber/reflex design for deep, clean powerful bass
- woofers and midranges with Altima membranes for optimum sound neutrality
- a large ribbon tweeter for sparkling, finely chiselled overtones
- exceedingly strong drive magnets for increased efficiency and precision
- select frequency separation components for the best possible signal processing
- deluxe Real Cable® internal wiring, so that not a single detail is lost
- slender construction, modern design, and premium high-gloss and genuine wood surfaces
- 10-year warranty ensures long-term, carefree enjoyment
- Handmade in Germany

Twenty-nine years ago, with TITAN and VULKAN, AURUM created speakers that brought a new dimension to listening. And from that same time, the two top performers have been accompanied by a somewhat slighter-built, but barely less eager sister: the MONTAN. Each generation has had the same genetic heritage, and naturally that also goes for the new AURUM MONTAN VIII.

The MONTAN VIII gets its remarkable musical talent from the genes of the TITAN VII and its legendary forerunners. This includes, among other things, its pressure-chamber/reflex design for deep, clean, powerful bass; the refined Altima membranes of the large-format, exceptionally sound-neutral woofers and midranges; and a ribbon tweeter based on the magnetostatic principle with a feather-light membrane that gives overtones a wondrous sparkle. Exceedingly strong drive magnets in every chassis optimize the efficiency factor and precision detail. With all these, select components on the frequency separating filter, as well as premium Real Cable® inner wiring, exploit every possibility for sound improvement.

The modern casing design brings a stylish accent to any household atmosphere and comes in high-gloss premium black or white. Additionally, we offer 3 genuine wood variations with a premium finish. Upon request, you can also get the MONTAN VIII in more than 180 custom colours.

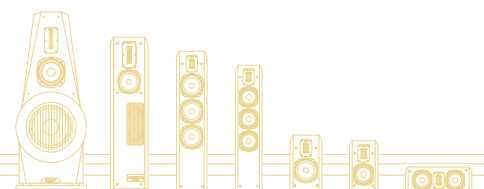

The price of the MONTAN VIII includes a 10-year manufacturer warranty. Self-confidence like that can come only from a brand-name manufacturer with decades of experience in building top-quality speakers.

PRESS RELEASE
May 2009

Even more refined: the new AURUM VIII generation of speakers

AURUM MONTAN VIII, AURUM WOTAN VIII,
AURUM ALTAN VIII, AURUM BASE VIII, AURUM MEGAN VIII
Finish: glossy black

PRESS RELEASE
May 2009

The new AURUM VIII generation of speakers

TITAN, VULKAN and MONTAN are names that capture the fascination of the high-end AURUM brand from quadral. As continuous audio trailblazers, they are now accompanied by a fresh new generation of the AURUM family.

The new AURUM WOTAN floorstanding speaker sports an especially slim look. However, its superior performance across the entire frequency range demonstrates its greatness. Its two 13 cm woofers and the 13 cm midrange speaker boast tried-and-true AURUM ALTIMA® membrane technology, which impressively combines sound neutrality, precision and valence.

With their detail resolution and uncompromising purity of music reproduction, they represent today's state of the art. The newly developed ribbon tweeter reaches even beyond the auditory threshold. It differentiates each sound nuance and captures it with the highest precision.

On a shelf or stand, the AURUM MEGAN two-way speaker cuts an elegant figure, despite its compact dimensions. Its sound neutrality is coupled with exemplary reproduction. Finally, the AURUM BASE VIII takes on the job of central speaker at the same sophisticated level and, thanks to runtime correction switching, allows excellent dialogue reproduction from all typical listening positions. AURUM – still better.

All AURUM models come in glossy black and white, or with real-wood cherry and oak veneer finishes.

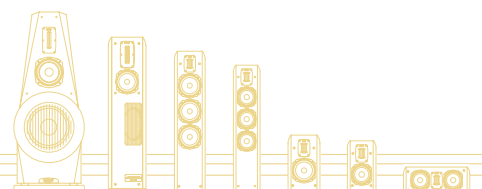

Naturally, AURUM's fourth generation also offers 180 custom RAL paint colours.

	real-wood veneer	glossy black & white
AURUM WOTAN:	1.000,00 Euro/piece	1.100,00 Euro/piece
AURUM MEGAN:	500,00 Euro/piece	550,00 Euro/piece

quadral PLATINUM line of speakers
Talent and determination

PLATINUM M5, PLATINUM M4, PLATINUM M2, PLATINUM M1 BASE

quadral PLATINUM line of speakers

Talent and determination

- Woofers with low-distortion aluminium membranes
- High-range ring transducer with titanium membrane
- Run-time correction for the centre speaker

Talent and determination – quadral's newest line of speakers, the PLATINUM M, brings virtually a live performance experience to the living room. Large-scale, low-distortion cone chassis with aluminium membranes, as well as an innovative ring transducer with titanium membrane, allow superb dynamics with immaculate acoustic colour.

The head of the family, and jack-of-all-trades, is the PLATINUM M5 pressure-chamber, bass-reflex upright. Profound and crisply precise are their two long-stroke 18 cm basses. Above them, two 13 cm chassis take care of the flawless midrange. And in between is quadral's new ring transducer, which brings dazzling overtones to the listening room.

The PLATINUM M4 is the almost equally talented, but somewhat smaller pressure-chamber bass-reflex upright. It boasts two hard-driving cone chassis and the new ring transducer with a titanium membrane. Whether right on the wall, on a stand or sideboard, or on a shelf, the reflex-construction PLATINUM M2 feels most at home near the wall. Its 13 cm mid/bass driver loves impressive bass runs, just as the ring transducer cherishes finely chiselled overtones, while the two harmonically share the midrange between them.

Conveying clear, intelligible film dialogue is the talent of the enclosed PLATINUM M1 Base central speaker. Run-time correction between the 13 cm mid/bass drivers broadens its horizontal angle of dispersion in the midrange.

Prices for the new PLATINUM M speakers are as follows:

PLATINUM M5	1.199,-- Euro/piece
PLATINUM M4	699,-- Euro/piece
PLATINUM M2	299,-- Euro/piece
PLATINUM M1 BASE	399,-- Euro/piece

quadral CHROMIUM STYLE

quadral SUB 88 DV aktiv, STYLE 50, STYLE 30, STYLE 10 BASE

quadral CHROMIUM STYLE

For premium sound reproduction from music and film DVDs, quadral GmbH & Co. KG has developed the four-member family of CHROMIUM STYLE speakers.

The line impressively shows that modern design and outstanding sound reproduction can come together in one series. Whether bookshelf, upright or subwoofer, all CHROMIUM STYLE speakers boast detail resolution, frequency range and dynamics that are optimized for surround sound.

The new titanium-coated 13 cm mid/bass driver contributes considerably to the quadral quality. An ultrafast band for the high-range, and a subtle circuit design guarantee exemplary tonal balance with razor-sharp detail. With almost any electronics, the CHROMIUM STYLE offers a special class of joyous sound experience.

As front speaker, the CHROMIUM STYLE 50 is available with a wattage rating of 100.

Despite its compact design, the CHROMIUM STYLE 30 surprises with its very structured, profound basses.

As central speaker, quadral offers the CHROMIUM STYLE 10 BASE, along with the fully active SUB 88 subwoofer. The speakers come in a choice of glossy black or brilliant white.

CHROMIUM STYLE 50	599,-- Euro/piece
CHROMIUM STYLE 30	349,-- Euro/piece
CHROMIUM STYLE 10 BASE	449,-- Euro/piece
SUB 88 DV aktiv	499,-- Euro/piece
